

LIQUID RING VACUUM PUMPS

Two Stage

GMP 230/120 - GMP 230/160 - GMP 230/200

Pressure Range : 33 - 1013 mbar
Suction Capacity : 175 - 440 m³/h

GÜCÜM Two Stage Liquid Ring Vacuum Pumps are used for pumping dry and wet gases, small quantities of liquid can be handled. They are used in the areas at which vacuum needed between the pressures 1013 to 33 mbar.

GÜCÜM Two Stage Liquid Ring Vacuum Pumps have the below features:

- * Able to pump every kind of gases and vapours,
- * Able to handle small quantities of liquid with gases,
- * Oil-free, no need to lubrication,
- * Pumped gas do not touch the oil,
- * Minimum maintenance with high efficiency,
- * No metallic contact of the rotating parts,
- * Works quiet and reduced vibration,
- * Nearly everywhere used with suitable material choices.

Service Liquid

During pump working, service liquid must be supplied to replenish the liquid ring and to cool the pump (generally water is used). The exhausted liquid could be used again after seperating the gas inside of it.

The direction of the rotation is clockwise, when looking from the motor on the pump.
